

**RFP and Schedule Update**  
**2022 EAL Renewables RFP**  
**June 2, 2022**

Entergy Arkansas, LLC. (“EAL”), hereby notifies interested parties of schedule and scope updates for the 2022 EAL Renewables RFP (“RFP”). The RFP is expected to be issued in June of 2022. In the RFP, EAL will be seeking to obtain approximately 1,000 megawatts of renewable resources through a combination of build-own-transfer (“B-O-T”) agreements, self-build alternatives, and power purchase agreements (“PPAs”). The guaranteed substantial completion date for a B-O-T transaction and the guaranteed commercial operation date (developmental resources) or guaranteed delivery term commencement date (existing resources) for a PPA transaction would be no earlier than May 31, 2025, and no later than December 31, 2026. EAL reserves the right to acquire out of the RFP more or less capacity than the above target. A portion of resources procured through the RFP may be allocated to specific customer contracts and/or agreements.

As new information becomes available, EAL will update potential bidders and other stakeholders through notices posted on the RFP website.

Please monitor the RFP website for further information about the RFP.
